# GIVE

Post-mortem tissue donation can provide hope for the future and peace during a time of loss.

A new program from the Children's Brain Tumor Tissue Consortium is empowering patients and families to help discover better treatments and cures for pediatric brain cancers.

**Just two things are required from families who wish to donate tissue:**

**Written consent** before the time of death

**One phone call** at the time of death

**To enroll or to learn more about participating call**  
**1-(833) 879-5983**  
or email  
**cbttcpostmortem@d3b.center**

Donating brain tissue at the time of a child's passing is a personal decision that is unique to each family. The CBTTC Post-Mortem Tissue Donation Program provides patients and families with the opportunity to advance cancer research through a simple donation process. Donated brain tissue allows researchers

to better understand how brain tumors form, and it is crucial to discovering more effective treatments for children in the future. To learn more about this important program, call or email the CBTTC or visit **[cbttc.org/patients-and-families/postmortemtissueprogram/](http://cbttc.org/patients-and-families/postmortemtissueprogram/)**
